WHY PLANT A TREE?

Only 9.2% of Mongolia's land area is covered by taiga and forest-steppe zones takes up.

WHY PLANT A TREE?

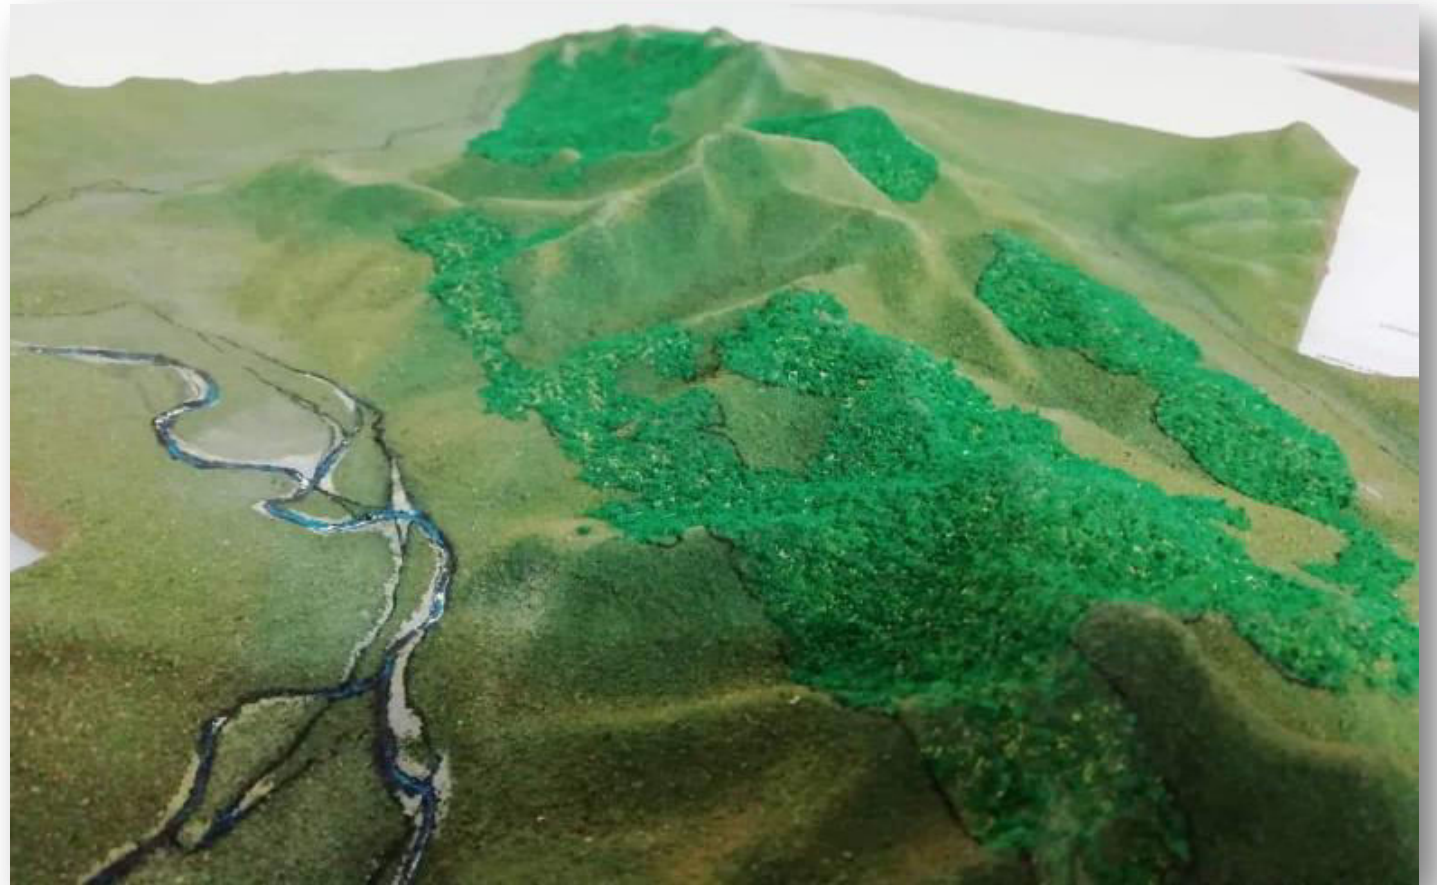

Our goal

The main goal of the project is to plant trees on 5 continents as part of the rehabilitation of Bayanzurkh Khairkhan. It has an important impact on improving the quality of life of the population.

The Bayanzurkh Khairkhan Mountain has been under human influence since 1989. Uncontrolled and unbureaucratic families and the love of the people of the Siberian countries try to "repair" the humanbased damages on the Bayanzurkh Mountain.

Our goal

We are working to increase public awareness and participation in combating desertification, which accounts for 82% of Mongolia's population, to share the knowledge and experience needed to reduce desertification, and to encourage every citizen to contribute to this work.

We also provide opportunities for every tourist visiting Mongolia to plant trees to contribute to the fight against global warming and reduce greenhouse gas emissions.

Our goal

Explain to children the importance of planting trees

teach the habit of planting trees with family, friends, and organizations

Opportunity for Mongolians living abroad to plant trees at home

OUR WORK ...

In 2010, we started working on the project in Zaamar soum of Tuv aimag. In 2013, a flower mandala was built in Bayangol district of Ulaan Batar.

As the project is designed to meet global reforestation standards, a feasibility study has been conducted by experts. Preparations for reforestation and rehabilitation began in 2015 and 2016, based on the findings of German forest engineer Manfred Fesper. In 2015, we received a planting site.

Улаанбаатар хотын "ногоон бүс" Баянзүрх хайрханг олон улсын сайн дурын гишүүдийн дэмжлэгээр дахин ойжуулах төсөл.

Хожуул сондуулаар бүрхэгдсэн Баянзүрх хайрханг дэлхийн сайн санаа иргэдийн тусламж дэмжлэгээр дахин моджуулан, 100,000 модтой цэцэрлэг хүрээлэнг байгуулах ажлыг эхлүүлж байна.

Энэ хүрээнд хүн бүр амин модтой болж, модыг зөв тарьж ургуулах хэвшилд суралцаж, цөлжилтийн эсрэг үр дүнтэй алхам хийж чадах юм. Эх дэлхий байгаль орчноо хайрладаг хүн бүр бидэнтэй нэгдээрэй.
